

The Experts, Caring For You

Doctors Devinder S. Mangat, Daniel G. Kuy and Allison M. Holzapfel believe that each individual has unique characteristics that deserve specialized care. This respect for the individual forms the basis of their philosophy: "Patients should receive personalized care before and after surgery and the goal always is to produce an improved and attractive, but natural, never-had-surgery look."

The practice has been boosting confidence for more than a quarter century when Dr. Mangat started the center in 1979. "I have the most extensive experience in the Tri-State performing facial plastic surgery—28 years," he says. "The most rewarding part of my job is the satisfaction I get when I see a patient's happiness after a successful operation."

Great results come from dedication, individualized care, making safety a priority and a focus on long-term, natural appearance, says Dr. Kuy. "We're perfectionists, and surgeries at the Mangat-Kuy Plastic Surgery Centers are completed to maximize results, followed by compassionate postoperative care by an exceptional team of doctors and nurses. We believe that long-term patient relationships are based on honesty and genuine care," he adds.

Dr. Holzapfel, who brings a unique woman's perspective to the practice, believes that true beauty is a combination of an attractive physical appearance and the inner beauty that comes from loving oneself. "I strive to be as creative and non-invasive as I can to make each one of my patients look and feel good. I am there for them from the start and for the duration of their healing process," she says.

- Swiss Surgery Society, Swiss Medical Society and Medical Society of Zurich

Specialties:

- Breast Surgery
- Ultrasonic Liposuction
- Abdominoplasty
- Facelift
- Eyelid Surgery

What is the favorite part of your job?

Seeing my patients after surgery with great results and a happy smile, expressing how much they enjoy the new change. I also thrive on the combination of the intensity of surgery and the opportunity to be creative. I know that my attention to detail has a big impact on the final outcome.

Devinder S. Mangat, MD, FACS

Education:

- University of Kentucky Medical Center

Board Certification:

- American Board of Facial Plastic & Reconstructive Surgery
- American Board of Otolaryngology

Internships:

- University of Iowa Hospitals and Clinic

Residencies:

- University of Kentucky, General Surgery
- University of Oklahoma, Otolaryngology, Head & Neck Surgery

- Endoscopic browlift
- Aesthetic injectables: Botox, Radiesse, Restylane, Juvederm, Sculptra
- Chemical Peels
- Laser resurfacing
- Otoplasty
- Mohs/Cancer defect reconstruction

What makes your practice unique?

Being a woman in the field of facial plastic surgery lends me a different perspective than the majority of surgeons. I can relate to the unique needs of women today and develop a plan to give the most improvement with the least amount of down time. Most patients tend to feel very comfortable relating their goals and concerns to me, allowing me to develop a strong, trusting relationship.
