

## DR. DEVINDER S. MANGAT

**FAVORITE PART OF YOUR JOB** Seeing patients post-surgery with a smile on their face and renewed confidence **BEST ADVICE YOU'VE RECEIVED** Pay attention, learn all you can and become as good at your specialty as possible **ALTERNATIVE OCCUPATION** Formula One race car driver **HOBBIES** Running, biking, skiing, golfing and mountain climbing **PLACE YOU GO TO ESCAPE THE OFFICE** The outdoors **FRAMED PHOTOS ON YOUR DESK** My wife and kids **RIGHT NOW I'M READING** Atlas Shrugged by Ayn Rand **I'M NEVER WITHOUT** My ethics

## RHINOPLASTY—BEAUTY IN THE DETAILS

Dr. Mangat has performed his share of repairs on nose jobs gone wrong. "Rhinoplasty is a highly-detailed procedure that requires the greatest degree of skill and experience," he says. "I'm not sure many people realize this when they rush into treatment." Dr. Mangat explains that his main focus during nose surgery is **DETERMINING HOW MUCH TISSUE TO PRESERVE, NOT HOW MUCH TO REMOVE**. "The nose can continue to change post-surgically for as many as two years if too much of the cartilage is removed," he says, adding that it's important to **AVOID AN "OVER-OPERATED" LOOK**. "What works on a teenage face may not look as good in 30 years, so you have to look at the big picture." In addition to perfecting profiles, Dr. Mangat performs a high number of endoscopic forehead lifts, a minimally-invasive way to elevate hooded brows that is ideal for the time-challenged. "The incisions in the hairline are miniscule and the recovery time is often less than a week," he says.

INSIDE INFORMATION

# in good hands

For over 30 years, Dr. Devinder Mangat has been transforming facial features and enhancing personal appearances. The friendly, outgoing physician is known both for his surgical talents and his commitment to patient care—former patients enjoy gratis post-operative follow-up services for up to one year.

In a field where experience counts, Dr. Mangat has lifted over 2,500 faces, refined over 2,000 noses and unveiled over 4,000 age-worn complexions via chemical peels. While 90 percent of his practice is cosmetic in nature, Dr. Mangat also lends his trained eye to complex reconstructive work, including scar removal for former skin cancer patients.

Whether he's consulting on a face, forehead, neck or eye lift, Dr. Mangat involves his patients in every aspect of the decision-making process. "Elective surgery can be nerve wracking and my number one goal is to put the patient at ease," he explains. "I offer thorough explanations and avoid medical terminology, which can be intimidating. I also encourage patients to come back for a second or even third consultation. I want them to feel good about the decision to move forward with treatment." For those seeking non-surgical solutions, Dr. Mangat offers rejuvenating "quick fixes" such as Botox®, Restylane®, Radiesse® and fat transfers, to eradicate wrinkles and flush out tired features. With safety and comfort ever in mind, Dr. Mangat performs all surgeries at his AAAHC-accredited surgical centers, and attends to each patient personally, immediately prior to surgery. "Before anesthesia is administered, I take their face in my hands and let them know we will be taking very good care of them," he says.
